Re: Plan of Operations for Removal of Palletized Stone Request for
Reconsideration dated October 13, 2009

Dear Ms. Bailey:

I am writing to request that you expedite my request for reconsideration of the proposed plan of operations to remove palletized stone from the Tejon quarries dated October 13, 2009. The request for expedited consideration is prompted by the discovery that the palletized stone located at the Tejon quarries is systematically being stolen. A Pickup truck and a truck with a trailer have been loading off the stone from the pallets and then discarding the empty pallets. The present loss to Stone Resources amounts to approximately \$6,400. Additionally the government may also be losing revenue. Significant costs have gone into mining, splitting and palletizing this lost stone which is now unrecoverable. The Tejon quarries are in a remote location. Stone Resources, without authorization from the BLM to remove this stone so it can be sold and the costs recovered for its purchase, does not have adequate cash flow resources to hire a watchman to prevent this unlawful activity.

In addition Home Depot has made a firm offer to purchase for resale through their retail outlets the Buckskin stone. There is sufficient buckskin stone presently located on pallets to satisfy this demand. Their major requirement is that the stone be ready for delivery by February 1, 2010. Were Stone Resources not able to fulfill this contract requirement and thus lose this order it would have a serious economic effect on Stone Resources and its employees.

It am again requesting a meeting to discuss these issues.

Respectfully submitted
Stone Resources

W. David Weston, Manager
